

## MADHU MEHACHOORNAM (HERBAL POWDER)

It is a very unique herbal powder made from leaves and roots of herbs; prepared under the supervision of experienced Ayurvedic Doctors.

### Indications

Clinical trails and studies have proved that it is very effective for all types of diabetic cases. Early detected diabetes will become completely regulated with this medicine. Old diabetic cases can also start this herbal treatment along with insulin and non insulin treatment. With one course of the treatment, patient's blood sugar level will come near control. Gradually the insulin and non insulin treatment can be completely stopped. After that the dosage of madhu mehachooranam is to be gradually reduced. It depends upon the blood sugar level and response to medicine. The herbal treatment is very effective for giddiness, wasting, weakness, body pain, inflammation, rheumatic diseases, muscular and skeletal disorders, Oedema, debility, sweating, itching which are commonly found in diabetic patients and for restoration of all vital powers. Even debilitated and chronic diabetic patients will be able to revive their original health and vitality by the consumption of madhu Mehachooranam continuously for a period of six months. This herbal medicine is not harmful in any way.

The quantity of medicine to be taken depends upon the blood sugar level (Old diabetic patients should take the medicine 6 months continuously and the other medicines can be reduced step by step only after the PP comes to the normal level). After the normalisation of blood sugar level the patient must take the water of madhu Mehachooranam regularly. Every month blood sugar level must be checked up.

### DOSAGE

Blood Sugar Level PP mg%	Quantity of Powder ( In Tabel Spoon)	Quantity of water (In glass)
> 400 mg	4	4
300 - 400 mg	3	3
200 - 300 mg	3	3
140 - 200 mg	2	2

### METHOD OF PREPARATION AND ADMINISTRATION

If the blood sugar level is 400 mg% add 4 table spoon full of powder to 4 glass of boiling water and make it to one glass. Cool it down and filter. Half - a- glass of this filtrate is to be drunk half an hour before breakfast and the remaining half before dinner. This can be taken also in milk. Boil the residue with 8 glass of water for 10-15 minutes, cool down and filter. The filtrate is to be consumed during the day time.

#### For very good results atleast 7 glass of water is to be taken

Patients having PP - 130 mg% need take only 1 table spoon powder. Boil this with 8 glass of water or 5 mts. Cool it down and filter. Atleast 7 glass of water should be taken per day. Adverse Reaction Occasional gastritis have been reported.
